

Viewing OneSearch results (basic Destiny interface)

Search the catalog as you normally would, choosing a keyword search. (Just type your search word(s) and then click on Enter if Keyword is the search in the left-most position, which is the default.)

Popups must be enabled in your browser.

The screenshot shows the Destiny OneSearch interface. At the top, there are navigation tabs: Home, Catalog, Circulation, Reports, and Back Office. Below these is a green header with 'Library Search > Search Results' and a 'Processing Needed' indicator. On the left is a 'Library Search' sidebar with options like 'Destiny Quest', 'WebPath Express', 'Digital Resources', 'Add Title', 'Import Titles', 'Export Titles', 'Update Titles', 'Update Copies', and 'Reading Program'. The main content area shows 'Searched for (tsunami) in Mercymount Country Day School (MCT)'. There are tabs for 'Titles', 'Web Sites', 'One Search', and 'Digital Resources'. A 'Printable' button is visible. Below the search title, it says 'Titles 1 - 3 out of 3' and 'Sort By Call Number'. The search results list 'Sweeping tsunamis' by Spilsbury, Louise, published in 2003, with a reading level of 5.8 and an interest level of 3-6. It also shows 'Accelerated Reader® Level: 6.1 / 1.0 pts.' and '1 of 1 available'.

OneSearch results appear on a separate tab after your search:

The screenshot shows the Destiny OneSearch interface with the 'One Search' tab selected. The search results are for 'tsunami' in the HistoryChannel.com database. The results show 'Found 359 results for "tsunami"' and a 'Show' button. A 'Get Results' button is also visible. There are three callout boxes with arrows pointing to specific elements: one pointing to the 'Show' button, one pointing to the 'HistoryChannel.com' logo, and one pointing to the 'Get Results' button.

Clicking here will not show search results, but take you to the main page for the database instead.

Click Show to see the search results from this database.

Results are displayed in the order in which each preset selected database responds to the request. Click Get Results to see search results from additional databases.

**Select the article you want to view.
If it does not pop up, close any popup windows and try it once again.**

Additional databases that were not pre-selected for each search are available in the Catalog using the Power search function.

The screenshot shows the Destiny OneSearch interface with the 'Power' search function selected. The search results are for 'tsunami' in the HistoryChannel.com database. The results show 'Found 359 results for "tsunami"' and a 'Show' button. A 'Get Results' button is also visible. There is a callout box with an arrow pointing to the 'Power' search function.

Additional databases that were not pre-selected for each search are available in the Catalog using the Power search function.
