### Note:

"Minimum" refers to hardware requirements for basic performance while running Destiny Quest. "Recommended" requirements imply increased system resources which will generally result in faster performance and more satisfactory end user experience.

Follett Software is committed to serving our customers by enhancing and providing Destiny functionality accessed through lower-end browsers and client machines. To provide a highly usable and productive web application experience, web user interfaces will be brought closer to desktop user interfaces, with the aid of rich web clients. As we are moving into rich internet application development, our new offering may require higher client specifications. Such applications will positively impact not only the customer experience but also the bandwidth utilization in the customer's network.
